

OZONE HAS CURED AIDS IN OVER 300 CASES!

"... in this article I will focus solely on medical ozone, which, in the case of AIDS, has already caused over 350 people in the U.S.A. to go into "complete spontaneous remission" wherein no trace of the virus can be found, verified by standard ELISA, Western Blot and PCR testing."

ED McCABE

Although oxygen therapies have been in use for over 100 years, Ed McCabe is the only person, to date, who has undertaken a worldwide investigation of their effectiveness. To do this he has interviewed thousands of patients, hundreds of doctors, and investigated the major therapy centres using oxygen therapies to successfully treat disease.

As an investigative journalist and author of the book *"Oxygen Therapies"*, I can make this statement of opinion in the title of this article, after interviewing thousands of people and hundreds of doctors using oxygen therapies over the past 5 years. Medical oxygen/ozone therapies are the single most effective medical treatment available to us today.

Everyone on this planet needs to be made increasingly aware that for several years now I have met and keep meeting people who no longer have AIDS, cancer, and almost any other disease you can think of, due to the continual and correct application of oxygen therapies. I have assembled the following information to educate you as to exactly what exists right now to help you. You will become increasingly thankful for this information as AIDS moves out of the social minority areas and into the heterosexual backyard. AIDS is the second leading cause of death for men between 25-44. Next year it will be the second leading cause of death for everyone. After that there is no limit to the destruction unless we immediately institute widespread medical ozone application.

It is well documented that for over one hundred years, a quiet multitude of patients and doctors have used special forms of ozone, hydrogen peroxide, magnesium peroxides combined with ozonides, "stabilised oxygen" products, and other singlet oxygen delivering substances to successfully detoxify the human body and eliminate disease. However effective each of these substances may be, none of them has thousands of practitioners using them daily and reporting their effectiveness like ozone has, coupled with the availability of an ongoing over 50 year medical track record.

So, in this article I will focus solely on medical ozone, which, in the case of AIDS, has already caused over 350 people in the U.S to go into "complete spontaneous remission" wherein no trace of the virus can be found, verified by standard ELISA, Western Blot and PCR testing. This healing also included energy and happiness increases, weight gains, and the disappearance of all the other standard disease indicators (markers). In short, plenty of people who had AIDS no longer have any virus or any secondary infections in their bodies, because ozone has oxidized the harmful causative agents. I have been reporting this phenomenon in print since 1988, but the numbers of documented cures are increasing substantially both within the U.S. "underground", and in Europe to the point that I do not think ozone can be repressed any longer.

The way the ozone works as a disease treatment is so simple that it befuddles the great minds. Unlike healthy human cells that love oxygen, the primitive viruses - like HIV - which are found in AIDS and other diseases are lower lifeform viruses. These viruses and related bacteria are anaerobic. That means these microbes cannot live in oxygen. Therefore, what would happen to these anaerobic viruses if they were to be completely surrounded with a very energetic form of pure oxygen called medical grade ozone? What if enough of this special form of oxygen/ozone were to be slowly and harmlessly introduced into the body every day over the course of a few months, while bypassing the lungs and saturating every fluid and cell with it? Can't live in oxygen... surrounded with oxygen. That is the subject of this

article.

If ozone is so good why hasn't everyone heard about it? Well, many have. I have been on over 700 radio and TV shows and speaking platforms telling people, but if I was to pick one word why ozone is not spoken of on the major media, it would be "Politics." Although millions of people, including little babies, have AIDS, and ozone definitely solves the problem if applied correctly, for long enough, and early enough, the U.S. medical establishment clings to the outmoded model of poisoning the body with toxic drugs to get rid of disease instead of cleaning the body out and boosting immunity by flooding the body with oxygen (ozone treatments). Most of the officials in the U.S. medical and regulatory community are financially tied to the pharmaceutical industry which, through interlocking directorates within all major media outlets, does not allow unprofitable (for them) competing therapies to emerge into the public debate, no matter how successful they are.

Although this fact of life is a tragic and callous disregard of human suffering, this not allowing competing therapies to emerge is especially true - as in the case of ozone - if the patents have all run out on the therapies, and if the therapies are now legally without owners and in the public domain.

In 1900 Nikola Tesla operated the "Tesla Ozone Company" in the U.S. Between 1958 and 1973, Dr. Robert Mayer and Dr. Edmund J. Ryan were granted 8 U.S. ozone patents, and European physicians have reported successfully using ozone for over 50 years to cure 33 major diseases. Quoting from the international MD's assembled at the May 1983 Sixth World Ozone Conference in Washington, D.C.:

Ozone eliminates... viruses and bacteria from blood, human and stored... Medical ozone is successfully used on AIDS, Herpes, Hepatitis, Mononucleosis, Cirrhosis of the liver, Gangrene, Cardiovascular Disease, Arteriosclerosis, High Cholesterol, Cancerous Tumours, Lymphomas, Leukemia... Highly effective on Rheumatoid and other Arthritis, Allergies of all types... Improves Multiple Sclerosis, ameliorates Alzheimers Disease, Senility, and Parkinson's... Effective on Proctitis, Colitis, Prostrate, Candidiasis, Trichomoniasis, Cystitis; Externally, ozone is effective in treating Acne, burns, leg ulcers, open sores and wounds, Eczema, and fungus."

These results were from many different clinics and repeated year after year.

Despite all this, the U.S. media still barrages us with sad pleas for money constantly so our medical establishment can "Find a cure" for these diseases. Well, if myself, only one man with a computer and a telephone, can find all this documentation I really don't think the medical establishment with all its money and vast resources is looking very hard. Do you?

In 1976, the U.S. FDA (Food & Drug Administration) published the following:

Ozone is a toxic gas with no known medical uses.

Printing this statement in a publication paid for with our taxes is either a blatant attempt at suppression of truth from the highest levels, or one of the poorest research jobs ever done. It obviously favours competitive therapies, and ignores well over 50 years of safe and effective medical use of ozone on hundreds of thousands of humans - backed up with thousands of medical references and clinical studies in Switzerland, Italy, France, Germany, Australia, New Zealand, Mexico and the U.S.

Let's compare medical ozone therapy with prescription drugs. In 1978 the FDA reported 1.5 million were hospitalised in the USA due to the side effects of medication. On the other hand, medical ozone has been legally used in clinics worldwide on a daily basis since the forties, and in Germany 644 ozone therapists were surveyed, and they reported 384,775 patients had received 5,579,238 ozone treatments. The side effect rate was only 0.0007% during 5.5 million dosages! Yet, each year approximately 140,000 people in the U.S die from prescription drug usage.

In 1979, we find one of the first U.S. cases of AIDS successfully being treated by medical ozone therapy. Dr. George Freibott from the International Association of Oxygen Therapy treated a Haitian living in Avon Park Florida who came to him with Kaposi's Sarcoma mouth lesions. The Haitian was treated with medical ozone in rectal insufflations, ozone colonics, and direct ozone IV injection on and off for one and a half years, yet only once a week. All his external lesions were eventually healed. No one knew about AIDS back then, but later on Dr. Freibott realised what he had treated.

Then in 1983, Dr. Sweet, et al., published in *Science*, a peer reviewed scientific journal - his study showing "Ozone Selectively Inhibits Human Cancer Cell Growth." This announcement shows ozone stops cancers, yet there was no response from mainstream medicine.

In 1986, Dr. Alexander Preuss in Stuttgart, FRG, published several case histories of AIDS patients treated with ozone who became completely healthy and went back to work. Also in 1986, on page 694 of the September 20th edition of the British Medical Journal, *Lancet* it was reported that the HIV virus transmits in saliva. In that same year the Medizone ozone company of New York applied for human testing approval of ozone.

Despite 50 years of use on humans and existing flawless and effective animal studies, the FDA still won't allow human testing, claiming ozone is "On clinical hold." What a great example of "newspeak." Sounds real officious, doesn't it? Like there's a problem, and our kindly government father will take care of everything, but it's a lie. No testing is being done while you might be next to die. Clinical hold just means "blackballed." Why would such a documented beneficial therapy be prevented from being looked at at all, while millions of innocents suffer - unless foul play is involved?

In 1987, Dr. Hans Neiper, an ozone using doctor in Hanover, FRG, in an interview by NHF videographer Jeff Harsh, talked about his colon cancer work. Although he says he can't divulge the name of his patients; "President Reagan is a very nice man." And, "You wouldn't believe how many FDA officials or relatives or acquaintances of FDA officials come to see me as patients in Hanover. You wouldn't believe this, or directors of the American Medical Association (AMA), or American Cancer Association, or the presidents of orthodox cancer institutes. That's the fact." Odd that it's good enough for, and sought after by the bigshots with enough money, but not allowed for the common people.

In 1988, NHF historian, Eustice Mullins wrote:

The Office of Technology Assessment of the U.S. Government states that 95% of the drugs on the market have not been proven to work."

In that year, I began travelling the world, lecturing and interviewing extensively upon the subject of ozone and oxygen therapies. I called all the major network news bureaus, including Public Radio, and reported ozone AIDS cures coming out of Europe. Not a single

In 1900 Nikola Tesla operated the "Tesla Ozone Company" in the U.S. Between 1958 and 1973, Dr. Robert Mayer and Dr. Edmund J. Ryan were granted 8 U.S. ozone patents, and European physicians have reported successfully using ozone for over 50 years to cure 33 major diseases.

reporter or show called back for details. I wrote and sent documentation to all of the "household word" TV talk show hosts who make their living by acting "concerned" and I tried with all the "AIDS fundraising spokespeople", show business celebs, even sending proof of their home addresses, but as of yet not one single phone call or inquiry came back asking for more. The shining media lights are not the big names who plunk down millions or give benefits for "research," but the many brave independent talk show hosts, show producers, and health expo promoters that have let me on to put the information out there for you. We owe them a debt of gratitude.

In 1989, the *Journal of the American Medical Association* reported a 72 year old woman who got AIDS from a blood transfusion. Her husband come down with the disease although they didn't have sex and only kissed.

That same year, George Perez, M.D., Dir. of Virology at Saint Michaels Medical Center, Newark, NJ, a major hospital, was commissioned to undertake a small 30 day ozone/AIDS study. Five AIDS patients underwent only two weeks of ozone treatments at the hospital. All had T-cell counts of below 200. At the start, one was so badly covered with herpes lesions he couldn't wear clothes. By the end of the two weeks his lesions were healed, and all the patients had been released from the hospital. No adverse side effects were reported. The T/4 (immune) cell counts remained stable or increased. Viral protein core (p24) counts decreased, indicating mass virus destruction. Four MD's reviewed the results and stated that ozone therapy is completely non-toxic, and should be adopted. Due to political pressure, the hospital tests were aborted.

Do you know anyone who got AIDS from a blood transfusion? In 1989, the American Red Cross turned down safe and effective ozone blood purification without allowing any discussion of it at a large meeting in their Washington DC headquarters. If ozone blood purification had been adopted, there would have been no-one from then on with AIDS or Hepatitis contracted from a transfusion. Odd that they would even discuss it.

In 1990, using special ozone equipment, HIV infected blood was converted from HIV* to HIV in less than 16 seconds, in vitro, by inventor Basil Wainwright. A Mr. James Pauls, Sr., (HIV*) was treated, and in only eight treatments, a 220% improvement in his T/4 cell response was achieved. FDA and Florida officials quickly moved in and the successful study was aborted mid-stream. Wainwright was jailed. Florida charged him with "Practicing Medicine Without A License," and the Federal Government charged him with "Fraud." Strangely, during the raid on the Wainwright home, police specifically only looked for and seized all his innovative technical papers, instead of any evidence of the crimes he was charged with. His history making mass life saving ozone delivery equipment was in the final stages of development at the time of the police raid.

The ex-wife of the editor of a large Florida newspaper got in a business dispute with Mr. Wainwright, so the newspaper manager ordered his intentionally biased reporters to almost weekly print extremely negative articles about this inventor and ozone in the hopes of turning the public against him and it. Former patients show up in the newspaper offices demanding justice for ozone and are ignored. For the sake of a personal vendetta against one person these newspaper people are personally responsible for the continuing suffering of thousands of people who could possible have gotten help if they weren't scaring people

away from Ozone. odd they are afraid to fairly investigate ozone while 126,000 U.S. citizens have died from AIDS, and 11+ million now have the death sentence of the disease.

I interviewed Mr. Wainwright who stated that, in his experienced opinion, although secondary in effectiveness to IV work, rectal insufflation would be most effective by applying the humidified ozone gas into an empty colon four times a day at a 27 mcg/ml (2% ozone/98% oxygen by weight) concentration, and in a volume of between 1/4 and 1/2 litre, depending upon patient colon size (@ 1/2 Lpm. flow rate) for 1 minute during each application.

In 1990, Dr. Michael Carpendale M.D., at the Veteran's Administration Hospital, San Francisco, and Joel Freeberg M.D., from U.C. Medical School in San Francisco, and the Bay Medical Research Foundation, privately published a medical paper entitled "Ozone Inactive HIV At Noncytotoxic Concentrations," stating:

HIV viral core levels (p24) were reduced in all ozone treated cultures compared to controls."

Finally, three years after the study had been concluded and had been under submission to them, a U.S. peer reviewed medical journal reported on ozone. The October 1st issue of the *Journal of the American Society of Hematology* published the ozone/HIV work of

MD's Wells, Latino, Galvachin, & Poesz. Their work entitled "Inactivation Of HIV Type 1 by Ozone In Vitro" describes the research by oncologist Dr. Bernard Poesz from the Syracuse State University of New York Research Hospital. They performed 15 replications of an ozone study that interfaced ozone with HIV infected factor 8 blood. The ozone completely removed the HIV virus from the blood 97 to 100% of the time, yet was non-toxic to normal healthy blood components. I had announced this study back in 1988, in my book *Oxygen Therapies*.

THINK THIS OVER. If ozone has hereby been proven in a peer reviewed journal to work so safely and effectively, registering a 97 - 100% kill rate on the most virulent recombinant virus known to man, how much more effective is it in the treatment of ALL the other lesser

viruses, thereby negating the need for all the allopathic vaccines and antibiotics for polio, chicken pox, mumps, swine flu, colds, and legionnaire's disease, etc.? Is this why FDA officials, many of which are financially connected with the pharmaceutical companies, have declared ozone to be on "clinical hold" and dare not allow U.S. human trials? What about human suffering? What about the majority of misguided people that believe the story line in the old movies and trust that the politicians are all humanitarians and would never do such a terrible thing as hold an AIDS cure back from little babies for profit?

Mr. James Caplan at CAPMED, a medical supply distributor in Philadelphia, sent all 150 of the top U.S. AIDS researchers copies of the above *Journal of Hematology* report showing that ozone, when used as a viricide, eliminated HIV. He invited questions or responses. Not one response was ever received from any of these "top" researchers using our tax money to "find a cure." Perhaps they are only looking for more funding instead. One of the original AIDS experts recently stated that all he could see as the result of all the millions of dollars being spent on AIDS research was that as he looks out in the parking lot, all his colleagues are now driving more expensive cars.

1991, Dr. Robert Mayer, who has been using ozone since the forties,

Five AIDS patients underwent only two weeks of ozone treatments at the hospital. At the start, one was so badly covered with herpes lesions he couldn't wear clothes. By the end of the two weeks his lesions were healed, and all the patients had been released from the hospital.

Four MD's reviewed the results and stated that ozone therapy is completely non-toxic, and should be adopted. Due to political pressure, the hospital tests were aborted.

had late stage AIDS patients in his research centre clinical ozone study who only had a count of 5 T-cells. Normal count is 600-1500+. Below 200 is generally assumed fatal. Although they had a count of only 5 T-cells, because of the applied three times a week ozone therapy, his patients are stabilising and returning to complete health. By 1992, Dr. Mayer was reporting a patient going HIV negative, confirmed by 3 Western Blot retests, and 3 ELISA retests.

In 1991, I interviewed a brave humanitarian, Dr. J. B. MD, ret., (requests privacy) in a southern state who came forward with his clinical combination peroxide bath/ozone/hyperbaric oxygen/vitamin/mineral therapy results. During 2 years of using the therapy, all his scientifically valid testing was performed at a major hospital and within independent labs. **He brought over 238 HIV POSITIVE patients to HIV NEGATIVE, each within 60 Days.** Everybody thinks if you cure AIDS you're instantly rich and famous. Wrong! His reward? An armed S.W.A.T. team invaded his house and office, seized his ozone machine, patient records and computer. This MD subsequently gave up medicine, and now grows tomatoes. Due to ongoing political problems, his former patients and the hospital and the testing labs are also hesitant to come forward due to their fear of political reprisals.

I wrote in my column in the Volume 2, Number 2 issue of *The Family News*, -

Unfortunately, regulatory agencies, U.S. health professionals, and news media reporters have been repeatedly lied to with the "ozone is worthless" gambit by agents of those who fund political campaigns and appoint officials to keep ozone out of circulation because it will negatively impact prescription drug sales. Well meaning FDA and state medical agents and police consequently erroneously think they are doing a good thing for sick people when they attack medical ozone and its practitioners. Unfortunately, the end result of what they are actually doing is different from what they intended."

In 1991, another physician (in New York) came forward to me with his clinical ozone results. He wants no press. One of his staff members who was in the clinic every day and therefore could get the treatments every day was brought from HIV positive to HIV negative. His T-cells went from 700 down to 150 as ozone killed off the diseased cells, and then back up to 1,100 as the body replaced then with fresh new healthy cells. Another M.D., in a southern state who I interviewed stated he and a colleague collectively brought 9 people to HIV NEGATIVE using a combination therapy that included ozone and DMSO. Neither will talk publicly. One had his house burned down and left the country.

In April of 1992, I interviewed Dr. Eric Satori M.D., and one of his cured AIDS patients. Dr. Satori told me the results he was getting with his own brand of direct IV ozone therapy which also includes mental conditioning, "To remove the reason the patient gets diseased." So far he has reported over 50 AIDS patients becoming virus free by combining subclavian heavy ozone treatments with vitamin, mineral, thymus, and homeopathic supplements. He reports he commonly gets results in **only 12 days** because he has been refining his therapy during 10 years of clinical research!

Everyone, including you, should check with a competent health care practitioner before using any medical therapy. But this time, first ask him "Have you had any actual hands-on training or clinical experience in any of the many ozone medical therapies?"

If your doctor is from the United States, the honest answer is always "No". So, how would your expert ever stick his liability laden neck

out and approve of it? He should simply say, "I have no knowledge of it." But unfortunately his ego might reveal itself if he says "Well, I never heard of it, so it must be quackery," or, "Ozone is a poisonous gas, and anyone injecting it will be killed."

All the detractors of ozone claim to be "experts", yet they have had no training in any oxidative modality, and there are no studies using correct accepted protocols to prove ozone doesn't work, so it's a mystery how they get away with substituting uneducated opinion for scientific fact in the newspapers.

The establishment "experts" all claim to be "searching for a cure", so why are they so afraid to try, let alone even discuss ozone? Especially with its over 50 years of safe, effective usage on hundreds of thousands of patients. The "old" fights the "new" at every historical pivot point. REMEMBER. Chiropractic, Psychiatry, and a surgeon washing his hands before he operates on someone, were ALL once labelled as "quackery".

Millions and billions of dollars are being made on treating and researching (not curing) the AIDS plague. As of late 1991, the manufacturer of AZT had made \$315 million on sales of it. If humanity continues to choose short term greed or unquestioning reliance upon authority figures as a lifestyle, we'll never be allowed to use medical ozone.

Unless humanity as a whole - and it just might emerge from the direction of the littlest of the "little guys" - finally wakes up and forces the societal controllers to let ozone out of the bag, then there will be only widespread sickness and death in every family. Humanity's sins of letting others take responsibility for their own lives will come to visit and live with them. Then where will they drive their shiny new car every day? Why, to the AIDS ward and the cemetery.

For now, the oxygen wars continue unabated. The shameful politics and non-responses of our medical system are so bad that even the most

unaware are hard pressed to believe we are simply facing a whole bunch of coincidental ignorance and errors. Government, media and medical bigwigs as a whole continue to strangely ignore openly disparage the over fifty year history of million of applications of safe, non-toxic ozone therapy, and, in fact continue to actively use S.W.A.T. teams and jail terms to suppress any further medical ozone research by MDs. People continue to suffer tragically and die needlessly, while many who love their families have their hearts slowly broken watching their significant other waste away. Rumours circulate, and the TV talk shows feature stories about AIDS being some form of planned racial or impersonal genocide to reduce the population.

Due to outright hostility, suppression, or at least non-response by our authorities, desperate people who are facing no alternative to their eventual death from AIDS, cancer or other killers are being forced into the unregulated "ozone underground". In any medical underground, where a therapy is not officially sanctioned or publicly known, mixed in along with the few shining humanitarians will always be con artist, scams, repression, and yellow journalism. You and your family deserve better than this.

According to the U.S. Government, by the year 2000, one out of one will have cancer at some time in their lives. Dr. Robert Strecker estimates 20 million now have AIDS, and that the number doubles every two years, maximum. This means by the year 2000, 320 million people are projected to have AIDS.

It's obvious as the bodies fall around us that the old ways don't work. How long can you afford to continue siding with the old ways before it's your turn at the undertakers cart? Ozone is the only proven poten-

He brought over 238 HIV+ patients to HIV, each within 60 Days. Everybody thinks if you cure AIDS you're instantly rich and famous. Wrong! His reward? An armed S.W.A.T. team invaded his house and office, seized his ozone machine, patient records and computer.

tial saviour of humanity with 50 years of safe usage backing it up. It's your choice, do something about this, or continue to ignore the problem until you or someone you love slowly sufferers and dies tragically from one of these diseases.

Unless you act, before long I won't see much hope left for anybody because EVERYBODY might be in the hospital. There will be no police left to seize ozone machines or "expert" doctors or newsmen left to tell us ozone is 'worthless'. The authority figures will already be dead or dying from the disease. Wild speculation? This has already happened in countless African towns. We have to stop buying into the illusion that 'authority' will save us. This a major part of humanity's great test foretold down through the ages. It is up to you, right now. You are not alone. Help surrounds you. Authority or community? Choose wisely.

Why haven't you heard all of this before? I can't answer for you. It's not from want of trying to reach you for years. Others have tried, and I've personally been on over 700 TV or radio stations, or speaking platforms. To be heard in this society, no matter how much truth you can deliver, you need a huge political machine that has conditioned everyone to automatically listen to it as authority. We who know the truth about ozone have no such political or media machine. The special interest machines that do exist have too much invested in their own momentum. That is why we need your help. We aren't getting rich. We only want to allow you the opportunity to save yourself from suffering at the hands of ignorance and greed.

If we join together we will live. We can still turn this thing around.

(This is a condensed part of a larger chronology found in Ed McCabe's soon to be released second book. His first work, the self-published bestseller *Oxygen Therapies*, has sold over 40,000 copies by word of mouth alone. To obtain a copy of *Oxygen Therapies*, contact the Sydney Esoteric Bookshop, 475 Elizabeth St, Surry Hills NSW 2020. Phone: 02 319 4224 - see advert inside front cover this issue).

ATTENTION OXYGEN THERAPY SUPPORTERS

ED McCABE IN AUSTRALIA, NOVEMBER '92

Nexus Magazine is sponsoring the Australian visit by Ed McCabe, who will deliver several public talks on the AIDS-Ozone connection and other results of his research. Please refer to the advert on the Back Cover of this issue for tour details.

During the tour, Nexus Magazine will be organising several in-depth meetings for practitioners of both 'conventional' and 'unconventional' medicines and therapies. Please contact Nexus Magazine for further details of these gatherings.

Nexus will be alerting the media, the government, AIDS organisations and the medical community - to the information Ed McCabe has gathered. To this end we call upon our readers to help make this tour a success. We are gathering testimonials about users' experience with oxygen therapies.. Please mail or fax your testimonials, (positive or negative)

to us. Confidentiality will be respected where requested.
